DETAILED ACTION

Allowable Subject Matter

1. Claims 1 – 4 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Claims 1 – 4 recite, inter alia, a method of growing a semiconductor layer structure, the method comprising the steps of growing a first (Al,Ga)N layer over a substrate at a first substrate temperature within the range 850°C to 1050°C by MBE using ammonia as the nitrogen precursor, cooling the substrate to a second substrate temperature lower than the first substrate temperature within the range 650°C to 1000°C, while maintaining the supply of ammonia to the substrate, growing an (In,Ga)N quantum well structure over the first (Al,Ga)N layer by MBE using ammonia as the nitrogen precursor, heating the substrate to a third substrate temperature higher than the second substrate temperature within the range 850°C to 1050°C, while maintaining the supply of ammonia to the substrate and growing a second (Al,Ga)N layer over the quantum well structure at the third substrate temperature by MBE using ammonia as the nitrogen precursor, wherein the ratio of the supplied ammonia to supplied elemental metal is within the range 10:1 to 10,000:1. The art of record does not disclose or anticipate the above limitation in combination with other claim elements nor would it be obvious to modify the art of record so as to form a device including the above limitation.

Conclusion

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
